

# SOLUTIONS for a HARSH ENVIRONMENT

**Brands: HDPE, Kimdura<sup>®</sup>, Polyart<sup>®</sup>, Polyester, Polyolith, Polystyrene, Tyvek<sup>®</sup>, Valéron<sup>®</sup>, V-Max/Lumber-Tuff<sup>™</sup>, and Vinyl**

- Strong and durable, even in extended exposure to sun, heat, cold and wind
- Withstands extreme temperatures (from -100°F - 270°F, -56°C - 104°C)
- Resists tearing, puncturing, weathering and recyclable
- Resists rot and mildew, perfect for outdoor use
- Water and chemical resistant for harsh environments
- Resists fading for long-lasting colors
- Can be sewn, glued or tagged without losing strength
- Thermal transfer, direct thermal, ink jet and laser printable
- Green Eco-friendly printing and recyclable materials

Valéron<sup>®</sup> Strength Films is the highest performing strength film product line.

Kimdura<sup>®</sup> is the only synthetic with true **smudge proof** topcoating. The most universally printable surface in the industry.

Polyolith: color compatible printing surface for process color for product identification.

Tyvek<sup>®</sup> is a legendary protective material from DuPont that combines a degree of strength, durability, lightweight, all-weather survivability and ease of printing.  
*Laser Tyvek Now Available!*

Vinyl and PET (Polyester) materials for drum labels.

## Applications:

- Apparel Tags & Labels
- Automotive Labels
- Barcode Tags & Labels
- Brick Tags & Labels**
- Cable/Wire/Self-tie
- Carpet Label (Sew-in)
- Caution Tags**
- Chemical Drum Labels**
- Compliance Labels
- Danger Tags**
- Destination Tags
- Direct Food Contact Inserts
- Food Inserts (FDA approved)

- Fish & Meat Tags**
- Furniture Tags**
- Garment Tags (Retail)
